In the United States and Canada five different times have been arranged by the Railway Companies. *Atlantic Time* is that of the 60th meridian, *Eastern* that of the 75th, *Central* that of the 90th, *Mountain* that of the 105th and *Pacific* that of the 120th meridian west of Greenwich. But the boundaries actually in use do not follow the above meridians exactly. Europe has three time systems: the *Western*, taking its time from Greenwich, the *Central*, or *Mid-European*, varying by one hour, and the *Oriental*, or *East-European*, varying by two hours, Australasia has adopted a Standard Zone time, ranging from 8 hours fast in West Australia to 11½ hours fast in New Zealand.

*The above-mentioned rates of duty for conveyances from £5 to £500 apply only when the instrument contains a statement certifying that the transaction thereby effected does not form part of a larger transaction or of a series of transactions in respect of which the amount or value, or the aggregate amount or value of the consideration, exceeds £500.

†In the absence of such a statement the duty chargeable is double that stated above.

‡Settlements (when marriage is not the consideration) which operate also as Conveyances or Transfers, are chargeable with duty as Conveyances or Transfers, and not as Settlements.

†The above-mentioned rates of duty for premiums on Leases, £5 to £500 (Column 7) apply only when the instrument contains a statement certifying that the transaction thereby effected does not form part of a larger transaction or of a series of transactions in respect of which the amount or value, or the aggregate amount or value of the consideration other than rent, exceeds £500.

‡In the absence of such a statement the duty chargeable is double that stated above. The double duty on the premium is also chargeable in all cases where the rent exceeds the sum of £20 a year. (Revenue Act, 1911, Section 15.)

ICELANDIC GREETINGS

Some of these visitors attended the Aberdeen Rotarians' luncheon yesterday. Another stranger in our midst, Mr Carl Olsen, the Belgian Consul for Iceland, brought greetings from the Reykjavik Rotary Club.

He didn't miss the opportunity of putting in a word for a country which many of us are apt to associate only with ice and hard-won catches of fish. He recommended Iceland as a country worth seeing in the summer time.

The Rotarians have an interesting address in store for them next Tuesday. Professor Carroll will describe last year's Siberian eclipse expedition of which he was in charge.

STEEL LIBRARY BOOKSTACKS

With a Roneo Duplicator you can send timely, frequent and **personal** letters to thousands of otherwise inaccessible prospective customers—a face to face talk, as it were, for the price of a stamp. You can seize opportunities while they are hot, for at a moment's notice the Roneo Duplicator reproduces your sales messages at the rate of thousands of perfect copies per hour.

THE RONEO DUPLICATOR

RONEO EQUIPMENT
TRADE MARK

If your printing costs are too high, and there are delays and other irritations, instal a Roneotype Office Printing Machine. Make it do all your printing on the premises—at a moment's notice—at the rate of thousands per hour—at a saving of at least 40% of printers' prices.

Personal sales letters, last minute offers, urgent price lists, booklets, labels, letterheads, leaflets—all done by the Roneotype at little more than the cost of ink and paper.

**THE RONEOTYPE
OFFICE PRINTING MACHINE**

RONEO EQUIPMENT
TRADE MARK

A Roneo Addressing Machine, operated by a junior, will address in a matter of hours work that formerly took as many days. From stencils cut on any typewriter it produces neat and accurate addresses on envelopes, statements, price lists, etc., at the rate of **800 per hour.**

The blank space on the stencil card can be utilised for records, such as purchases, classes of goods bought, credit limits, quotations, "follow-up" letters, and so on. This makes the Roneo Addressing System doubly valuable, in that it combines a card index system as well. Guide cards and a variety of colours for the stencil cards make any system of indexing or classification possible.

Steel Partitions and Doors

Cunard White Star Ltd.

Movable Unit Steel Partitions

Roneo Steel Partitions and Doors are built up from standard unit sections to suit any requirements of office planning. They are readily taken down and re-arranged, without damage, at any future time. This permits the grouping of the staff of each department regardless of its growth or diminution, and greatly increases the value of the floor space. Every room becomes a fire-resisting unit, and the stove enamelled finish may be in any colour to suit the general colour scheme.

Steel Library Bookstacks and Library Equipment

Roneo Steel Bookstacks solve two of the most serious problems in Library equipment, namely, risk of fire and economy of space. Books in themselves do not burn readily, but a blaze arising from, and fed by, wooden equipment will soon destroy them. Steel Shelving increases the book capacity of the stack room by a considerable percentage.

The Roneo Company was the first in England to manufacture Steel Library Equipment on a large scale, and to-day holds premier position, having at Romford, Essex, the largest factory of its kind, especially equipped for the manufacture of such work.

THE "FLEXA" FILING SYSTEM

NO System deals with filing problems so completely and yet with such simplicity as the "Flexa" System.

It is speedy—giving immediate access to any wanted paper.

It dispenses with the Card Index.

It cuts out 99 per cent. of possible errors, and enables you to round up the remainder in a few moments.

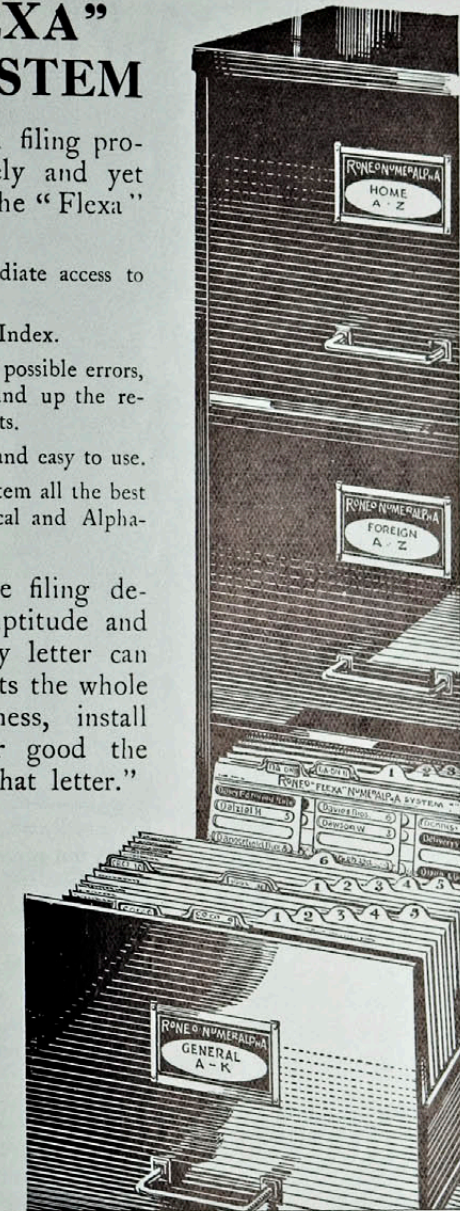

It is simple—easy to learn and easy to use.

It embraces in the one system all the best points of both Numerical and Alphabetical Systems.

As the efficiency of the filing department, and the promptitude and precision with which any letter can be produced, vitally affects the whole working of any business, install "Flexa" and banish for good the phrase "I cannot find that letter."

The

Professional Use

Useful for:

Doctors Householders
Clergymen Shopkeepers
Authors Restaurants
Dentists Hotels
Libraries Clubs
Architects Farmers
Engineers Students

Most homes and many private offices would like a really efficient plan for taking care of letters and papers. When these are filed in the Roneo "Junior" Filing Outfit, one knows exactly where to lay hands on Accounts, Receipts, or Correspondence, and they are stored in a strong and convenient steel cabinet, under lock and key, thus assuring privacy.

The outside overall dimensions of the box are:

The X-ray of Business

**ESTABLISHES FACTS
ELIMINATES
GUESSWORK**

Reveals vital facts clearly which, in book or ordinary card-index records, are hidden and extracted with difficulty.

Records can be maintained in **half the time.**
No loss or mis-filing of cards.

Coloured Signals **automatically** show essential data.

An essential aid to Business Control

Necessary action can be taken immediately as the record is always up-to-date and the state of affairs is seen at a glance.

For every record:—

- 1. Customers Record**
You can see at a glance ALL those who have not purchased from you recently.
- 2. Ledger**
You can see at a glance those accounts which are not being paid promptly and are three, six, or more months in arrears. Invaluable for hire purchase accounts.
- 3. Stock Record**
You can see at a glance those stocks which are too small, too big, slow moving, and so on.
- 4. Works Record**
You can see at a glance the stage of progress of each and every job. Facilitates following up orders which are behindhand or urgent.

RONEOTOL

a vision control vertical card-index

Roneotol is a new Roneo system which converts the ordinary "blind" card index into an up-to-date yet inexpensive visible card system with practical signalling possibilities.

As soon as the drawer is opened, the titles on the cards are seen at a glance, as the top edges are spread apart by the Roneotol springs which are the basis of the system. Speed of entry and reference is thereby doubled.

For use with Ledger Posting Equipment, Roneotol is expressly designed for convenience in handling account cards and for speed in locating and replacing them, enabling the maximum output to be obtained from Ledger Posting Machines.

THE NEOPOST Postal Franking Machine

The "Neopost" is a compact and simple machine which franks and postmarks envelopes, wrappers, labels, etc., with one turn of the handle. Sanctioned by the Postmaster General and authorised for International use.

- SAVES** the time spent in purchasing, issuing and sticking stamps. "Neopost" franks letters in a fraction of time, while a counter records the postage expended which is paid periodically by cheque or a round sum.
- SAVES** the value of stamps lost in pilfering or carelessness. "Neopost" impressions ARE NOT negotiable.
- SAVES** the cost of printing of envelopes. By means of an interchangeable slogan device, various designs may be kept and fitted as required.

**For FORCEFUL-
ECONOMY**
"IF UNDELIVERED RETURN TO ETC"
cost to print - 7/6 per 1000
